THE CHRIST-LIGHT FOUNDATION

“Power for successful living”

A MYSTIC - MUSICAL - TRAVELING MINISTRY

The foundation bases its theology upon the **“DIVINE FLAME ARTICLES OF LIGHT”**, a collection of 33 Divine principle documents which offer personal guidance and soul growth, The three main documents being, “The 12 Gratitude’s of love”, and “The 7 Gifts of light”, and the “Christ-Light Meditations”. These documents were given through spirit to Antonio Newton by the Ascended masters and light workers in October of 1998 in Los Angeles California as an aid to planetary awakening and vibrational raising of the new millennium.

A MESSAGE FROM THE FOUNDER

With the speeding up of events during these times in the new millennium of peace, the collapsing and destruction of many established systems of thought, philosophy in the home and workplace, this includes the advancement, growth and aggression of negative and evil forces that would have souls fail. The time is now, urgent and crucial to empower, awaken, and embrace and express the Divine Christ-Light of love, power and joy that lives and shines within each of us.

This light can be a nourisher and in living through this powerful and historical planetary transition to a new level of creative reality at its richest and most expressive state. Each moment during these times, we are bombarded with negative thoughts and energies of one nature or another. The stronger our relationship with the Christ-Light, the greater protection we have from these influences affecting our lives in some profound manner. Through the power and dynamics of musical sound vibration spiritually charged in combination with a strong burning Christ-Light in our being, can be a potent weapon and shield as well as an energizing creative life force.

Actually the Christ-Light is a magnificent divine gift and blessing to us mortal as a source of unbounded joy, peace and comfort that fulfills the mortal soul. The Christ-Light when merged with the internal Divine light and life force of God the Father, creates a uniquely profound and powerful life force and expanded consciousness. The white-gold-violet Christ-Light is one of the most potent energy and forces in this or any other Universe. Its qualities are essential and contributive to creative expression and manifestation, as well as nurturing essences and qualities which fuel the human spirit.

Miraculous in its power of manifestation, the Christ-Light can cause great shifts in life experiences, health, and relationships towards harmonious ends. We are speaking about using some of the same energy that creates the universe and reality. It therefore behooves us strongly, as love compels, to naturally have it, to experience our beat and full potential through a close relationship with God the Creator and Jesus' Divine Christ-Light within, around and through us. After-all, we are, co-creators.

CHRIST-LIGHT MEDITATIONS

#1 - HEART CENTER

- Place your awareness at your heart center area and become aware of the point of golden light, encased in scintillating white, surrounded in violet. Feel that point of light start to expand, sparkle and activate other light cells throughout your body with each new incoming breath. Allow this light to flow deeply into the head, mind and brain areas. Allow the light to penetrate into the energy field around you. Become one with the Christ-Light and feel the presence of God, Christ and the Holy Spirit. As you bath in this light, feel yourself becoming lighter and lighter until you are floating in a cloud of loving and warm light for approximately 15 minutes. Upon coming out of meditation, affirm that this Christ-Light will continue to sustain, comfort, heal and guide you toward your highest and best destiny.

ARTICLE XIV

#2 - CHRIST-POINT WITH STAR

- Focus your awareness on point-globe, approximately 3 feet above the head, filled white, bright light. Within the globe which is about 2 feet in diameter is a brightly lit golden 6 point Star of David, surrounded by a circle of shining rich vibrating violet color. Allow this globe to become filled with as much light as possible and to become as large as it can be. Allow a column of light to extended from the bottom of the globe through the top/crown of your head down to your heart center area See and feel the colors and star pulsating and vibrating luminescent energy from your heart throughout your body, mind and soul. Feel the light lifting you up and raising your vibration to a state of pure love and wholeness for 15 minutes. Upon returning to normal awareness, condense the light into a point within the heart and affirm your oneness with it.

I AND THE CHRIST-LIGHT ARE ONE I AM, I AM, I AM.

ARTICLE XV

#3 - CHRIST-POINT WITH BREATH AND SOUND

First imagine a globe of light. This point is called, “The Christ Point”, 3 feet above your head. The globe will vary in size from a small point to a large ball of energy, depending upon your use of the Christ-Light.

With each inhalation of the breath, allow the globe to be filled with white energy, then gold and finally violet.

When the globe is full of intense light, allow the light to stream down through the crown of the head into the heart region.

When at the heart center, take three deep, strong breaths. Visualize an extra flow of Christ-Light energy entering through the crown of the head, down to the heart. At the heart center, hold your breath for as long as possible for three consecutive cycles while mentally visualizing that you are storing the Christ-Light energy in the heart center. Feel the heat while storing this energy. Personal prayer requests and healings can be used at this time.

At the head region, visualize the Christ-Light as a glowing bright hue that surrounds your head for approximately 10 minutes, then quickly condense the light into the center of your brain-mind.

Now return to the globe and allow it to first form three whirling concentric circles, spinning clock and clockwise directions, which cleanses and rejuvenates your energy field that surrounds you.

When the whirling seems sufficient, imagine that you hear a clang or bell sound which instantly stops the whirling and forms into a thick, solid energy field of a protective shield.
